(a) Total number of wage or salary earners in employment excluding employees in the defence forces at home or abroad and Government "relief" workers. Figures for June, 1933, July, 1939, and June, 1943, were obtained from the Census, National Register and Civilian Register respectively. (b) Average earnings per employed male unit. Male units represent total male employment plus a proportion of female employment based on the approximate rates of female to male earnings. Seasonally adjusted. (c) All building operations for which permits granted by Local Government Authorities. Excludes Government buildings (see footnote, page 27).

(d) Including owner-built houses. Quarterly averages for years, and quarterly totals. (e) June, 1933. (f) July, 1939. (g) Affected by industrial disputes.

(a) Excess of births over deaths. For the period September, 1939 to June, 1947, excess of births over civilian deaths only.
 (b) Excess of arrivals over departures. A minus sign (—) denotes excess of departures over arrivals. Excludes troop movements for the period September, 1939 to June, 1947.
 (c) Includes natural increase and net migration together with adjustments for deaths of defence personnel and unrecorded movement of population between July, 1933 and June, 1947.
 (d) Census—30th June, 1947.

OVERSEA MIGRATION.

Permanent migration refers to persons, other than Australian troops and their dependants, intending residence for one year or longer—in Australia in the case of arrivals, and abroad in the case of departures. Temporary migration refers to persons intending residence for shorter periods, together with Australian troops and dependants from July, 1947, onwards, irrespective of length of intended residence.

(a) Estimates based on Pay-roll Tax returns. Excludes National Service trainees in camp. Figures from June, 1945, subject to revision. (b) Includes Northern Territory and Australian Capital Territory.

AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS.

The following figures are derived from employment and wages recorded on Pay-Roll Tax returns (which cover approximately 80 per cent. of total employment) and from estimates of the unrecorded balance. Pay of members of the armed forces is not included. The figures are not seasonally adjusted. A seasonally adjusted monthly index of average weekly wage earnings is published on page 2.

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Total wages as above divided by total civil employment expressed in male units. Male units equals the number of males plus a proportion of females based on the approximate ratio of female to male earnings. The same ratio has been used in each State and because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. The break in continuity is marked because a sudden change in the proportion used to convert females to male equivalents (52 per cent. to 55 per cent.) throws some doubt on the accuracy of comparison between these two periods.

NOTE.—Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

TRADE UNION UNEMPLOYMENT RETURNS.

The only records of unemployment available continuously over a long period of years at short intervals are the quarterly percentages reported by trade unions to the Commonwealth Statistician. The membership of the reporting unions consists predominantly of males, and represents at present about 55 per cent. of the total trade union membership and between 25 and 30 per cent. of all wage and salary earners. For some States the returns are more representative than for others. This table, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States. It is an indication of trend of unemployment as estimated or recorded by secretaries of those trade unions which supply returns. Returns are not collected from unions whose members are predominantly in permanent employment (Governmental, &c.) or casual employment (wharf labourers, &c.). The percentages relate to unemployment due to all causes except unemployment of those directly involved in industrial disputes.

EXPORT PRICE INDEXES.

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals and for wheat (since July, 1945) the index of prices is deduced from average value of current sales or shipments and hence shows some irregularity.

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the prices of the commodities are multiplied by the average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36.

(Base of each Section : Average 3 years ended June, 1939 = 100.)

EXPORT PRICE INDEXES—continued.

RECENT TRENDS—EXPORT PRICE INDEX—WOOL AND "OTHER GROUPS".

Reference to the group indexes in the table on page 18 hereof will show the great increases and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards occurred in the price of wool during the twelve months ended June, 1951. Similar, but less marked, movements have occurred in prices of metals and hides. Since wool is a predominant export (with 46 per cent. of the Base Aggregate of the index) fluctuations in wool prices obscure the movements affecting the other components in the All Groups index. For purposes of comparison they are shown separately below.

(Base of each Section : Average 3 years ended June, 1939 = 100.)

MONTH-TO-MONTH INDEX : CHANGING WEIGHTS.

The index-numbers in the two preceding tables, while they indicate satisfactorily the general trend of the market, take no account of the relative quantities actually sold at the different prices ruling during each month. In consequence the index-numbers do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the index-numbers (including gold) in the following table, in the computation of which the "quantity-multipliers" are changed each month. The index-numbers are designed solely for comparisons of current prices with those of the corresponding months, or periods of months, of the preceding year.

(Base : Weighted Average Price level in corresponding months of preceding year = 100.)

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

Note (b) —

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Legislation which became effective on 14th December, 1950, had the effect of reducing (by bounty) the price paid for raw wool for local manufacture in Australia below the open market (auction room) price. Such reductions were virtually retrospective to August, 1950, and continued until 30th June, 1951. The effective prices paid for raw wool for local manufacture (i.e., auction room price less bounty) have been used in calculating the index published on page 20 hereof. Below are shown these same indexes calculated on the auction-room prices for wool. Only the four columns shown below are affected.

RETAIL PRICE AND WAGE-RATE INDEXES.

In the tables on this and the following page the index-numbers have been recomputed uniformly to the base average 3 years ended June, 1939 = 1,000 in order to facilitate comparisons with other data. The absolute index-numbers differ, in consequence, from those appearing in other publications of the Bureau.

PRIMARY PRODUCTION PRICE INDEXES.

The annual index-numbers in the following table have been recomputed to the base average 3 years ended June, 1939 = 100 from the revised series published in *Production Bulletin*, Part II. They are based in general on prices realized in the principal markets of Australia.

The monthly index-numbers (based on the nearest equivalent wholesale price quotations) are intended progressively to forecast the point which the annual index-numbers will eventually reach, and so provide a preliminary figure for the latest full year pending the completion of the annual census of production. The preliminary index-numbers will be revised as each production census is completed.

(Base : Average 3 years ended June, 1939 = 100.)

SECURITY PRICE INDEXES.

In comparing movements in the two sets of index-numbers on this page, attention should be paid to differences in the methods by which they have been constructed, and in the nature of the companies and the types of shares included in each index. These are outlined in the footnotes to the table.

(a) Compiled by the New South Wales Government Statistician. The index-numbers are based on the prices of the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. They represent unweighted averages of the mean monthly prices per £1 of paid-up capital. Adjustments are made where capital is written off or bonus shares issued. Recomputed from original base, par values.

(b) Compiled by the Queensland Bureau of Industry. The index-numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index-numbers represent unweighted averages. Mean monthly values are used. Recomputed from original base, April, 1928.

(c) These shares relate to leading companies and do not include bank shares or mining shares.

NOTE.—The National Security (Building Control) Regulations, which operated from 5th December, 1940, placed the granting of building permits for new buildings or alterations costing more than £5,000 under the control of the Commonwealth Treasurer. Various amending regulations made the control more stringent. On 19th June, 1942, the control passed to the Department for War Organization of Industry, after which date only alterations costing less than £25 could be made without consent. From 31st August, 1945, when control passed to the Department of Works and Housing, consent was not necessary for the erection of a dwelling house costing less than £1,200 or for repairs and alterations to a residential building costing less than £150 in any financial year. As from 1st November, 1945, the Commonwealth Government relinquished control over building permits and delegated its powers under National Security Regulations to the States until State legislation had been introduced. This action has been taken in all States except Tasmania, which discontinued control over building permits from 31st December, 1946. The "value of permits" shown above relates to the value of building permits issued by local government authorities and not to approvals granted under the Regulations. The values shown exclude, in general, air raid shelters and alterations for protection against air raids.

GOVERNMENT RAILWAYS : FREIGHT, PASSENGERS AND REVENUE.

The following table shows statistics of freight and passengers carried and of revenue earned on the five Mainland State Railways to the end of June, 1947. From July, 1947, particulars relate to all State and Commonwealth Railway Systems.

The daily average number of passenger-journeys is obtained by dividing the monthly totals by the *total* number of days in the month.

Period.	Freight Carried.		Passenger-Journeys.	Gross Revenue.	Net Revenue.
	Net Ton Miles.	Average haul per ton.

WHOLESALE TRADE.

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. The returns do not relate to all wholesale trade, and exclude sales of vendors trading only in exempt goods. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degree. Insufficient information is available to enable adjustments to be made to the crude figures on this account. Monthly totals are compiled on a basis comparable with the monthly averages for preceding years.
